Ready or Not:

Wildfire Season's Here.

Zone Zero Cheat Sheet

The **first five feet from your home** is the danger zone. If you leave it cluttered & flammable, you're inviting embers to burn your house down.

What To Do (It's not too late):

- ☑ REPLACE BARK/MULCH WITH GRAVEL, PAVERS, OR CONCRETE
- ☑ CLEAR DEAD PLANTS, LEAVES, & DEBRIS (ROOF, GUTTERS, STAIRS, DECKS)
- ☑ CUT BRANCHES 10 FT. FROM CHIMNEYS/STOVEPIPES
- ☑ MOVE FIREWOOD, LUMBER, CHAIRS, PLANTERS AWAY FROM HOUSE
- ☑ REPLACE WOOD GATES/ARBORS WITH NONCOMBUSTIBLE OPTIONS
- ☑ REMOVE TRASH CANS, TIRES, RVs, BOATS FROM ZONE ZERO

PROTECT YOUR HOME WITH A 5 FOOT ZONE

CREATE DEFENSIBLE SPACE

Why Should You Care? Because most homes lost to wildfire are taken out by flying embers that can travel for miles, **not** a wall of flames.
